You look out for your community — now we're looking out for you.

Substances New Vision Can Treat

New Vision is able to provide a safe medical stabilization setting for those dependent on:

- ✓ Alcohol
- ✓ Benzodiazepines (Valium, Xanax)
- ✓ Opioids (Heroin, Fentanyl)
- ✓ Methamphetamine
- ✓ Cocaine
- ✓ Combined Substances
- ✓ Prescription Medications

Service Overview

New Vision helps people through the withdrawal process safely and effectively. The service accepts adults 18 & older who are currently using or are experiencing acute withdrawal symptoms from certain drugs. Treatment consists of a medically supervised hospital stay for inpatient stabilization & detox that typically lasts 3–5 days. Most insurance plans are accepted.

Our Treatment Protocols

New Vision offers scheduled medication tapers, according to evidence-based practice, published by the American Society of Addiction Medicine (ASAM).

Additionally, New Vision offers various medications to accommodate break-through withdrawal symptoms, promoting comfort and preserving dignity.

As a New Vision patient, you can expect:

- ▶ Confidentiality
- ▶ A private medical experience
- ▶ Admission on a "regular" patient floor, not a special wing or unit
- ▶ A personalized discharge plan for continuing care with private treatment providers that understand the sensitive and unique needs of first responders
